Subject: Well Abandonment and Replacement
Boeing Realty Company C-6 Facility
Los Angeles, CA

Dear Mr. Ross:

Thank you for taking the time to meet with me last Friday (May 8, 1998) to discuss Boeing's well abandonment and replacement proposal.

As discussed at the meeting, the proposed AutoNation building would overlap three existing groundwater monitoring wells, WCC-8S, WCC-1S, and WCC-1D (see attached Figure 1). The groundwater quality in this area has been regularly monitored and extensively studied since 1987. It is our joint understanding that the decommissioning of these three wells will not affect the existing groundwater monitoring program.

I am therefore requesting your approval to abandon wells WCC-8S, WCC-1S, and WCC-1D at the C-6 facility. Upon receipt of your approval, Integrated will submit its contractor's detailed well abandonment work plan for your review before field implementation. Furthermore, one new monitoring well screening in the Bellflower aquiclude (designated as BRC -1 in the attached Figure 2) will be installed outside the building footprint once the AutoNation building is constructed.

Please contact me at your convenience if any discussion of these requests is desired.

Respectfully submitted,

Michael Y. Young, Ph.D.
President
